Infrastructure engineer responsible for **production database availability** — ZDLRA backup policy design, Data Guard replication and disaster recovery for Oracle 19c/21c, operated from a 24/7 command center with sub-second RPO targets. Ten years across manufacturing QC, IT support, product implementation and project management taught me the same discipline from four different angles: **a system is only as good as its recovery path**. Outside the datacenter I build with AI and Web3, and trade XAU on a written, risk-first system.

EXPERIENCE

Database & Backup Infrastructure Engineer

Jakarta Metropolitan Area · Hybrid

2024 – Present

- Manage ZDLRA infrastructure: backup policy design, VPC administration and capacity planning for production database tiers.
- Monitor and optimise backup throughput with real-time redo transport, targeting sub-second RPO.
- Respond to critical database incidents from a 24/7 command center, owning incident response and escalation procedures.
- Execute regular backup recovery tests and disaster recovery drills; produce daily and weekly operational metrics.
- Administer Oracle 19c/21c production databases with Data Guard replication and RAC cluster monitoring.
- Deploy backup modules, configure database-to-ZDLRA connectivity and troubleshoot backup failures.

Assistant Technical Manager

PT IPro Citra Indonesia

Feb 2024 – Present · Jakarta Barat

- Corrective maintenance team: defined project scope, timelines, budgets and resource allocation with stakeholders.
- Ran day-to-day delivery — status reporting, deviation tracking and corrective action across scope, schedule and cost.
- Enforced QA gates and risk mitigation plans; maintained project charters, test records and closure documentation.

IT Application Trainer (Implementor)

R Systems

Feb 2024 · Jakarta Pusat

- Deployed OMS and DSR applications at distributor sites for a national FMCG rollout (PT Multi Bintang Indonesia).
- Trained distributor admins and sales representatives to operational competence; gathered field requirements during deployment.

EARLIER EXPERIENCE

Product Specialist

SCG — PT Indoris Printingdo

Jan 2021 – Dec 2023 · Tangerang

- Owned finishing-line quality for Epson printer packaging against fixed specification and quality standards.
- Operated finishing machinery, inspected output per shift, isolated defective product and escalated root causes.
- Recorded production volume and inspection results per shift; proposed improvements to hit output targets.

Repair Technician Team Lead

PT Vivo Mobile Indonesia

Jun 2016 – Jun 2018 · Tangerang

- Led the breakdown team detecting and analysing NG smartphone units during factory production.
- Compiled failure reports for the overseas engineering team and executed approved rework to spec.
- Maintained the engineering repair database as the audit record for every repair performed.

IT Support Specialist

PT Visionet Data Internasional

Jun 2018 – Dec 2020 · Karawaci

- Monitored device fleet health 24/7 through monitoring platforms; logged alerts and routed them to owning teams.
- Drove incidents to resolution against SLA, escalating stalled tickets and closing the loop with reporters.
- Diagnosed issues remotely for field engineers; heavy Excel reporting (VLOOKUP, HLOOKUP, pivot).

Lamp Assembly

PT Indonesia Stanley Electric

Jan 2016 – Jun 2016 · Tigaraksa

- Assembled and inspected lamp units against technical drawings and company quality standards.
- Managed component inventory and routine equipment maintenance to keep the line running.
